

A self-managed group is a group of specialists who work together and provide eConsults through the Specific Provider or Group (Direct to Specialist) model.

Substance Treatment And Rehabilitation Team (START)

- This is a self-managed group based out of Kingston Health Sciences Centre. Select the “Specific Provider or Group” option when sending a consult, and search for this group in the text box.
- START provides assessment and advice to physicians caring for patients with Substance Use Disorders (SUD). The team is comprised of three family physicians and a psychiatrist with additional expertise in Addiction Medicine who work in a variety of settings, including community opioid agonist clinics, emergency departments, family practice obstetrics, and primary care.
- Current members: Dr. Adam Newman, Dr. Louise Good, Dr. Taras Reshetukha and Dr. Irene Zouros

Glomerulonephritis and Pregnancy

- This is a self-managed group based out of Kingston Health Sciences Centre. Select the “Specific Provider or Group” option when sending a consult, and search for this group in the text box.
- A group of specialists who provide comprehensive assessment of patients with known or suspected primary and secondary forms of glomerulonephritis. They also provide comprehensive obstetric nephrology care including pre conception counselling and optimisation, pregnancy and post partum care.
- Current members: Dr. Sarah Moran and Dr. Jocelyn Garland
